

Dermatology Drug Development

Dedicated clinical teams with 25+ years of therapeutic expertise

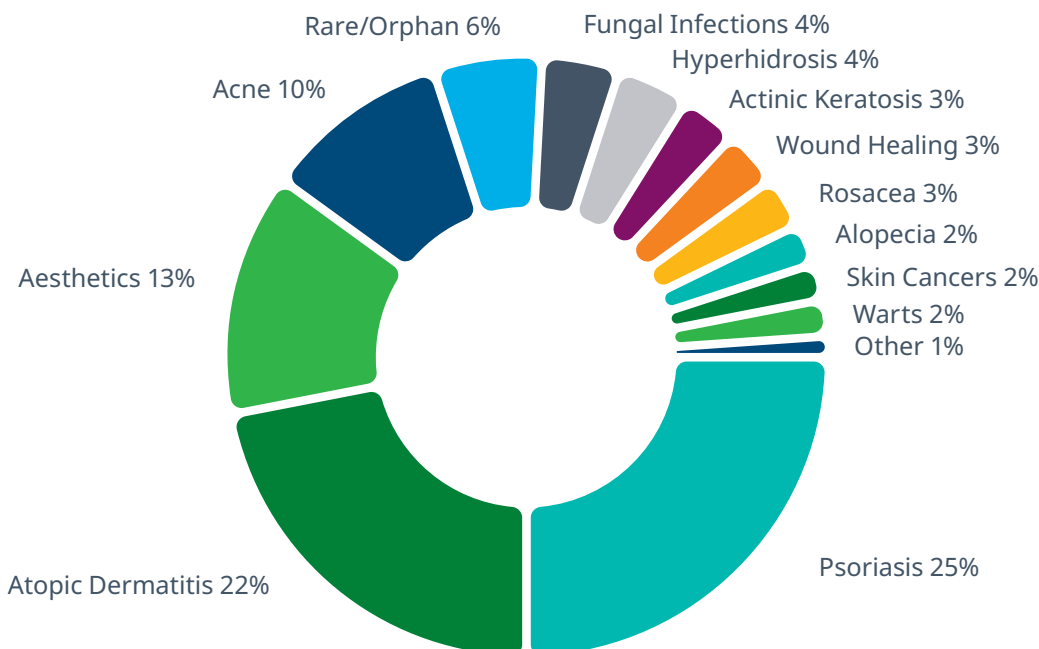

Biotech companies are advancing clinical innovation in dermatology at unprecedented speed. To keep pace, sponsors need partners with a vast array of dermatology indication expertise and strong clinical trial operations who can support complex development programs from strategy through execution.

By connecting scientific, medical and operational capabilities across a broad portfolio, we apply data-driven tools and predictive models to enable realistic planning and informed decision-making. This integrated approach helps manage trial complexity, improve predictability and deliver studies on time and on budget, while keeping patients at the center and accelerating development timelines.

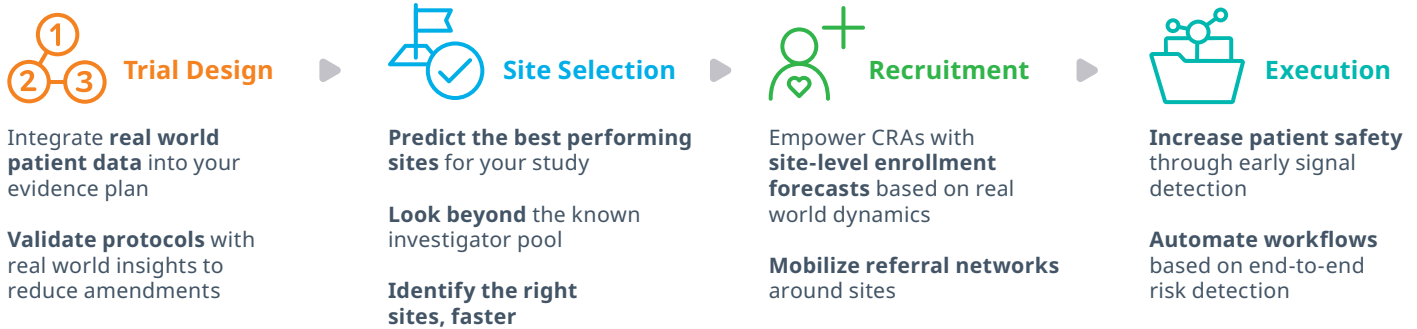

Experience by Indication

From psoriasis, atopic dermatitis and acne to aesthetics and rare dermatologic diseases, IQVIA Biotech has partnered on more than 225 trials over the past five years, delivering proven expertise across the full spectrum of dermatology research.

Dermatology clinical research powered by Connected Intelligence™

Partnering with IQVIA Biotech means you're connected to the right data, technology and expertise from protocol design through study execution. Powered by IQVIA's Connected Intelligence™, the integration of industry-leading technology, healthcare data and life sciences expertise, and IQVIA Healthcare-grade AI®, sponsors can harness advanced analytics and trusted insights to make smarter decisions, reduce development risk and improve trial outcomes. The result is a faster, more efficient path to bringing dermatology therapies to patients.

 225+ DERMATOLOGY STUDIES	 34,000+ PATIENTS	 AMERICAS, EUROPE, ASIA PACIFIC OPERATIONS	 14 FDA APPROVALS

GLOBAL SCALE. LOCAL JAPAC EXPERTISE.

IQVIA Biotech delivers the reach of a global CRO with the flexibility and focus biotech companies need to succeed in Japan and Asia Pacific. With offices spanning 15 countries in the JAPAC region, our teams provide deep regional knowledge across regulatory, operational and patient recruitment landscapes.

Our therapeutically trained teams have conducted more than 225+ dermatology studies in the past five years.

PARTNER WITH IQVIA BIOTECH

Transform your dermatology clinical development with a CRO that combines scientific expertise, operational excellence and a patient-first mindset. Our integrated global capabilities and biotech-focused flexibility ensure your trial is precise, predictable and efficient.
